❄️ How to Make a Paper Snowflake

STEP 1 – Start With a Square Fold your paper diagonally corner-to-corner to make a big triangle.

STEP 2 – Fold Again- Fold the triangle in half to make a smaller triangle.

STEP 3 – Fold Into Thirds-Take one corner and fold it toward the center. Then fold the other side over the top so it looks like a narrow cone. (It may look uneven – that's okay!)

STEP 4 – Trim the Shape-Cut off the pointed tip at the bottom so the edges are straight.

STEP 5 – Prepare to Cut-You now have a folded "slice" that will become your snowflake.

STEP 6 – Draw Your Design - Use markers or a pencil to draw fun shapes:

Triangles • Curves • Small diamonds • Stripes (Keep shapes near the edges – that's where the magic happens when unfolded!)

STEP 7 – Cut the Shapes-Carefully cut out the shapes you drew. The more you cut, the more detailed your snowflake will be!

STEP 8 – Unfold Your Snowflake-Gently open the paper to reveal your beautiful snowflake design. Flatten and decorate it with glitter, crayons, or stickers.
