

DINOSAUR DISCOVERY SET

CRITTER
CORNER

Shine a light to uncover prehistoric secrets!

© 2025 My Critter Corner • Educational Fun for Curious Minds

THANK YOU FOR YOUR PURCHASE!

We're so happy you chose the Dinosaur Discovery Set from My Critter Corner!

Your support helps bring imaginative, educational fun to classrooms and homes around the world.

We hope this activity sparks curiosity, creativity, and plenty of "wow!" moments as children explore the world of prehistoric creatures. A fantastic way for children to learn the names of the most popular dinosaurs!

DIRECTIONS

Print both pages on standard A4 paper.

Use a glue stick to lightly attach the fossil sheet on top of the colored dinosaur sheet. (Avoid liquid glue as it will create wrinkling but if needed use lightly.)

Dim the lights in the room.

Shine a small flashlight (like a penlight) from behind the page — and watch the dinosaurs' bodies and names glow through!

Enjoy discovering how each dinosaur might have looked millions of years ago.

A great Companion Activity! See our FREE Dino Slime Recipe at www.mycrittercorner.com
